

# WHY KJ THERAPY

1. We provide door-to-door services for home rehabilitation treatment for patients with limited mobility.
  - ♦ Our home based therapy can be personalised to your need and giving you the privacy at the same time.
2. We had perfectly combine traditional massage with modern sports rehabilitation.
  - ♦ Relief of joint stiffness caused by hypertonia after stroke with massage.
  - ♦ Strengthening muscle strength through exercise improves patient's support and balance ability and increases joint flexibility.
3. We help patients and their families manage their emotions and enhance their confidence in returning to society.

## POST-STROKE THERAPY

A healing process to increase mobility  
& boost blood circulation

## WHY IS OUR THERAPY GOOD FOR YOU?

### Home-Based Therapy

- ◆ An ideal way for people with special needs who cannot step a foot into the massage centre. Home-based massage also provides you with greater privacy and a more personalized treatment.

### Experienced Therapist

- ◆ We take strict hiring in our place. Our therapists will access each patient's case and tailor rehabilitative massage techniques to the affected area.

### Emotional Support

- ◆ Emotional support is very important for stroke patients. Studies have found that more proper emotional support helps with the recovery process and mental wellbeing of a post stroke patient.

### Pre-Natal Massage 产后推拿

#### ◆ *Relieve Stress for Overall Body* ◆

Pre-natal massage not only helps to relax the muscles, promotes blood circulation, also reduce water retention during pregnancy. KJ Therapy aims to help mummies, reduce stress, and improves sleep quality.

### Post-Natal Therapy 产后推拿

#### ◆ *Increase Blood Circulation & Improves Immunity* ◆

Giving birth can take a lot out of a woman's body. Post-natal massage helps to relieve back pain from breastfeeding. Our massage also prevents postpartum depression.

### Post-Stroke Therapy 中风理疗

#### ◆ *Improves Joint Function, Sensation & Mobility* ◆

It has been demonstrated that massage therapy can assist stroke survivors in reducing stress and generating brain chemicals that fight depression.

Our therapists are aware that post-stroke sufferers require emotional support in addition to massage therapy. By listening during therapy and providing counselling as needed, we provide sincere emotional support.
